

**DANH SÁCH CÁC BÀI BÁO
ĐƯỢC CẬP NHẬT TRÊN MATHSCINET
TRONG NĂM 2005**

1. [Dang Dinh Ang](#) Stress field in an elastic strip in frictionless contact with a rigid stamp. *Vietnam J. Math.* 33 (2005), no. 4, 469–475. [74M15](#)
2. [Duong Minh Duc](#); [An, Le Hai](#); [Du, Pham Xuan](#); [Tuoc, Phan Van](#) Lagrange multipliers for functions derivable along directions in a linear subspace. *Proc. Amer. Math. Soc.* 133 (2005), no. 2, 595–604 (electronic). (Reviewer: Wenming Zou) [90C48 \(35J25 35J60 46G05 49J40 90C46\)](#)
3. [Duc, Duong Minh](#); [Thanh Vu, Nguyen](#) Nonuniformly elliptic equations of Δ -Laplacian type. *Nonlinear Anal.* 61 (2005), no. 8, 1483–1495. [35J60 \(35J20 35J70 47J30\)](#)
4. [Bui Xuan Hai](#); [Le Khac Huynh](#) On maximal subgroups in division rings. *Acta Math. Vietnam.* 30 (2005), no. 1, 35–43. (Reviewer: Igor V. Erovenko) [16K20](#)
5. [Khanh, P. Q.](#) ; [Bao, T. Q.](#); A projection-type algorithm for pseudomonotone nonlipschitzian multivalued variational inequalities. *Generalized convexity, generalized monotonicity and applications*, 113–129, *Nonconvex Optim. Appl.*, 77, Springer, New York, 2005. (Reviewer: Valeria Ruggiero) [49J40 \(65K10 90C25\)](#)
6. [Phan Quoc Khanh](#); [Tran Hue Nuong](#); [Le Minh Luu](#) Parameterized multiobjective optimization. Necessary optimality conditions and variational inequalities. *Proceedings of the Sixth Vietnamese Mathematical Conference*, 159–170, Hanoi Natl. Univ. Publ. House, Hanoi, 2005. (Reviewer: Laura Carosi) [90C29 \(49J40 90C31 91A12 91A23\)](#)
7. [Khanh, Phan Quoc](#); [Luu, Le Minh](#) Some existence results for vector quasivariational inequalities involving multifunctions and applications to traffic equilibrium problems. *J. Global Optim.* 32 (2005), no. 4, 551–568. [49J40 \(47J20 90C29\)](#)
8. [Khanh, Phan Quoc](#); [Luu, Le Minh](#) Upper semicontinuity of the solution set to parametric vector quasivariational inequalities. *J. Global Optim.* 32 (2005), no. 4, 569–580. (Reviewer: Gérard Lebourg) [49J53 \(47J20 49J40 90C31\)](#)
9. [Long, Nguyen Thanh](#) On the nonlinear wave equation $u_{tt} - B(t, |u|, |u_x|) u_{xx} = f(x, t, u, u_x, u_t, |u|, |u_x|)$ associated with the mixed homogeneous conditions. *J. Math. Anal. Appl.* 306 (2005), no. 1, 243–268. [35L70 \(35B20 35C20\)](#)
10. [Long, Nguyen Thanh](#); [Tam, Nguyen Cong](#); [Truc, Nguyen Thi Thao](#) On the nonlinear wave equation with the mixed nonhomogeneous conditions: linear approximation and asymptotic expansion of solutions. *Demonstratio Math.* 38(2005), no. 2, 365–386. [35L70 \(35C20 35L20\)](#)
11. [Long, Nguyen Thanh](#); [Ut, Le Van](#); [Truc, Nguyen Thi Thao](#) On a shock problem involving a linear viscoelastic bar. *Nonlinear Anal.* 63 (2005), no. 2, 198–224. [35L15 \(74D05 74J40 74K10\)](#)
12. [Nguyen Thanh Long](#) Linear approximation and asymptotic expansion associated with some nonlinear wave equations. *Proceedings of the Sixth Vietnamese Mathematical Conference*, 171–182, Hanoi Natl. Univ. Publ. House, Hanoi, 2005. [35L70 \(35A35 35C20\)](#)

[65M99](#))

13. [Long, Nguyen Thanh](#) Nonlinear Kirchhoff-Carrier wave equation in a unit membrane with mixed homogeneous boundary conditions. *Electron. J. Differential Equations* **2005**, No. 138, 18 pp. (electronic). [35L70 \(35Q72\)](#)
14. [Nguyen Thanh Long](#); [Dinh, Alain Pham Ngoc](#); [Tran Ngoc Diem](#) On a shock problem involving a nonlinear viscoelastic bar. *Bound. Value Probl.* **2005**, no. 3, 337–358. [35L70 \(35A35 35B65 35C20 74D10 74H20 74K10\)](#)
15. [Quan, Pham Hoang](#); [Dung, Nguyen](#) A backward nonlinear heat equation: regularization with error estimates. *Appl. Anal.* **84** (2005), no. 4, 343–355. [35K55 \(35K20\)](#)
16. [Quan, P. H.](#); [Thanh, D. N.](#); [Trong, D. D.](#) Recovering the surface temperature history of a two-layer composite body. *Appl. Anal.* **84** (2005), no. 8, 833–842. [35R30 \(35C15 35K05 35R25 65M32 80A23\)](#)
17. [Trong, Dang Duc](#); [Long, Nguyen Thanh](#); [Alain, Pham Ngoc Dinh](#) Nonhomogeneous heat equation: identification and regularization for the inhomogeneous term. *J. Math. Anal. Appl.* **312** (2005), no. 1, 93–104. [35K20 \(35R30\)](#)
18. [Trong, D. D.](#) ; [Matsuura, T.](#); [Saitoh, S.](#); Approximate and analytical inversion formulas in heat conduction on multidimensional spaces. Inverse problems: modeling and simulation. *J. Inverse Ill-Posed Probl.* **13** (2005),no. 3-6, 479–493. (Reviewer: Chein-Shan Liu) [80A23 \(35C15 35K05 35R25 35R30 65M32\)](#)
19. [Quan, P. H.](#); [Lien, T. N.](#); [Trong, D. D.](#) A discrete form of the backward heat problem on the plane. *Int. J. Evol. Equ.* **1** (2005), no. 3, 265–279. [35R30 \(35K05\)](#)
20. [Nguyen Bac-Van](#); [Le Minh Tri](#) Analysis of matrix data. (English summary)
Proceedings of the Sixth Vietnamese Mathematical Conference ,253–258, Hanoi Natl. Univ .Publ. House, Hanoi, 2005.
21. [Van, Nguyen Thi Thu](#); [Nguyen, Van Hien](#); [Strodiot, Jean-Jacques](#) A bundle interior proximal method for solving convex minimization problems. *J. Convex Anal.* **12** (2005), no. 1, 95–111. (Reviewer: Teemu Pennanen) [90C51 \(90C25\)](#)
22. [Huynh, Vu Quang](#) **Reidemeister torsion, twisted Alexander polynomial, the A-polynomial, and the colored Jones polynomial of some classes of knots.** Thesis (Ph.D.)–State University of New York at Buffalo. 2005. 100 pp. ISBN: 978-0542-11756-5 [ProQuest LLC](#)
